

VACATURE / VACANCY:

PROCESS ENGINEER

Our company

Econvert Water & Energy in Heerenveen, the Netherlands, focuses on the sustainable purification of industrial wastewater and biogas treatment. The company is specialized in anaerobic technology. A multi-project organization consisting of enthusiastic professionals who like to operate in teams. Operating internationally and always striving for improvement. Whether it is wastewater from the paper industry, a brewery or a potato processing company, Econvert Water & Energy comes up with the right solution for and with the customer. A growing and dynamic organization that gives you energy. In order to cope with the continuing growth we are looking for a driven:

Process Engineer

You want to use your process engineering experience and qualities to contribute to more sustainable production cycles. From your previous positions it can be clearly seen that you have the experience and skills to overlook the process side of a project. You are capable of having in-depth technological discussions with customers and suppliers and you are able to convince people.

Your tasks:

- Process engineer in wastewater and biogas treatment plant projects
- Responsible for the quality of process designs (i.e. process dimensioning, PFD, mass and energy balances, functional specifications) and to provide them in a timely manner
- Responsible for the technological testing and start-up of the installation on site, assuring that the installation meets its demands and guarantees
- Assist the project manager in technological issues in progress meetings with the customer

Your competences:

- Bachelor degree (or equal) in Process Engineering
- Minimum 4 years of experience in an equal position in a similar industry
- Affinity with wastewater / biogas treatment
- Affinity with biotechnology
- Well organized structured approach and able to set priorities
- Good communication skills
- Able to work independently as well as part of a team
- Languages: Dutch & English (obligatory) and German. Other languages beneficial.
- Willing to travel on a frequent basis

We offer:

- A competitive salary with appropriate secondary conditions
- A pleasant work environment within an enthusiastic team of professionals
- An open and respectful corporate culture
- Possibilities to develop yourself
